

ABOUT

Kathleen has been in the DC design and furniture industry for over thirty years. After working as a designer for over ten years, she realized she had a passion for furniture. Kathleen believes furniture is what really makes a space come to life.

Kathleen brings experience and vision to her team and her Clients. She likes being in the thick of the action and thoroughly enjoys working with designers and Clients. Her vast knowledge of the contract furniture industry allows each of the spaces she works on to feel uniquely customized to fit the Client's brand and needs.

If Kathleen won the lottery, she would open a rescue center for senior dogs and cats, which of course would be furnished with comfortable lounge furniture.

The details are not the details. They make the design.
